

ACE™ 3.8L ST

SYSTEMIC SEED-DELIVERED FUNGICIDE THAT PROVIDES BROAD-SPECTRUM PROTECTION AGAINST SEED- AND SOIL-BORNE DISEASES.

Ace™ 3.8L ST is a systemic broad-spectrum fungicide seed treatment formulated specifically for protection against a wide variety of seed- and soil-borne diseases. This product does not provide activity against *Pythium* spp. or *Phytophthora* spp. To provide best seedling protection against these specific fungal pathogens, use this product in combination with a seed treatment fungicide containing metalaxyl-M (mefenoxam) at the label rate registered for your crop and disease complex. Consult the label for appropriate use rate and follow all use instructions and precautions for both products.

For broader spectrum control, this product may be mixed in a water-based slurry with other registered seed treatment insecticides and fungicides, however, do not use with other seed treatment products unless previous experience assures compatibility.

PRODUCT FEATURES

- Broad-spectrum, preventative disease protection
- Systemic activity on labeled crops
- Excellent activity on early season *Fusarium*, *Rhizoctonia*, seed- and soil-borne *Aspergillus* spp. and *Penicillium* spp., seed rot, damping off and other seedling infections
- High concentration, low application rate, ideal for tank mixing
- Excellent compatibility with other fungicides for enhanced disease protection

USAGE RATES*

Corn: 0.044 - 0.085 fl oz/100 lbs seed

Soybeans: 0.085 fl oz/100 lbs seed

Wheat: 0.051 - 0.085 fl oz/100 lbs seed

*Refer to product label for specific crops and usage rates based on target diseases.
