

ANCHOR™ 3L ST

UNIQUE LIQUID SYSTEMIC SEED-APPLIED FUNGICIDE THAT PROTECTS THE SEED AND SEEDLING AGAINST EARLY SEASON DISEASES.

Anchor™ 3L ST is a systemic fungicide seed dressing specifically for protection against systemic downy mildews and diseases caused by soil-borne *Pythium* and *Phytophthora* spp. When a rate range is specified, use higher specified rates of this product when the disease pressure is expected to be high. For protection against other soil-borne diseases, for example *Rhizoctonia* spp., apply this product combination with other registered seed dressing fungicides.

Apply as a water-based slurry through standard liquid-type seed treatment equipment that provides uniform seed coverage. Seed treaters with atomizers or spinning discs are highly recommended for better product coverage on the seed.

PRODUCT FEATURES

- New, water-based seed treatment formulation that delivers performance and value
- Provides consistent early-season protection in cool, wet conditions against diseases that cause damping-off, seed rot and systemic downy mildew
- Provides improved formulation stability versus metalaxyl
- Delivers seed and seedling disease protection against *Pythium* and *Phytophthora*
- Developed with proven performance and seed safety

USAGE RATES*

Corn: 0.0425-0.64 fl oz/100 lb seed

Soybeans: 0.16-0.64 fl oz/100 lb seed

Wheat (cereal grains): 0.0425-0.64 fl oz/100 lb seed

*Refer to product label for specific crops and usage rates based on target diseases.
